Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/562,854

Applicant(s)

CERRUTI ET AL.

Examiner

Marcus Menezes

Art Unit

3677

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 December 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-12 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-4 and 8-12 is/are rejected.
- 7) ☒ Claim(s) 5-7 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 27 December 2005 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
- 1) ☒ Certified copies of the priority documents have been received.
 - 2) ☐ Certified copies of the priority documents have been received in Application No. _____.
 - 3) ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date 10/10/2006.

- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 and 8-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koyanagi et al. (US-5,584,107, hereinafter "Koyanagi").

Koyanagi discloses a coupling device for restraining belts, comprising a body (10) intended to be connected to at least one belt branch (2), and a pair of tongue elements (3) intended to be connected each to a respective belt branch, wherein each tongue element includes an attachment point (33) for connection with the respective belt branch and a stem portion (31) arranged to be received and locked in the body, said stem portion forming a catch tooth represented by the area surrounding and including the hole (37), wherein said catch tooth is for locking the tongue element in the body. (See Fig. 4 and 6a) Further, each tongue element comprises of a metal insert that is partially covered by a coating, but said tongue element, including the metal insert, is not wholly covered or coated. (See col. 5, lines 9-17). However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have covered the entire tongue element(s), since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use is a matter of obvious design choice.

Koyanagi further discloses that the metal insert of each tongue element comprises an essentially flat portion having a first part extending into the attachment portion and a second part extending into the stem portion of the tongue element. As for the limb, such a modification to the metal insert would have involved a mere change of shape of an element. A change in shape or form is generally recognized as being within the level of ordinary skill in the art. Further, nothing essential or unexpected is offered from this shape.

Koyanagi also discloses that the body comprises of a latching mechanism that includes a locking means (20,22) arranged to be moved in a perpendicularly direction to the direction of insertion of the stem portions of the tone elements into and out of the body from a coupled position, in which the locking means engages the catch teeth of the tongue elements to prevent the latter from being ejected from the body and a released position, in which said locking means disengages from the catch tooth, thus allowing the ejection of the elements from the body. (See Fig. 6a)

F i g. 1 5 (b)

Also disclosed by Koyanagi about said tongue elements are connecting members (35A,35B) for ensuring the alignment of the elements. (See Fig. 4 and col. 5, lines 20-32). Further, said connecting members comprise at least a projection (35B) formed by the one tongue element and at least one cavity (35A) provided in the other tongue element to receive the respective projection.

Allowable Subject Matter

3. Claims 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marcus Menezes whose telephone number is 571-272-6284. The examiner can normally be reached on 8:00am - 5:30pm M-F.

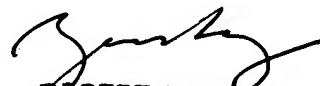

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Swann can be reached on 571-272-7075. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
